

Many types of food service outlets embrace delivery as a means of enhancing guest experience. With this in mind, DayMark Safety Systems offers the TamperSeal labelling system: a line of tamper-evident labels for use in the food delivery service industry. Using the labels in conjunction with the MenuPilot® app allows for date code information, safe food handling tips, a company logo and other types of customised information to be printed on the label.

TAMPERSEAL™

TAMPER-EVIDENT LABELS

**Tamper-resistant is not enough.
Ensure your deliveries are safe!**

TamperSeal labels adhere to most any packaging material safely and securely. Each label has security slits that cause the label to lose their integrity if someone attempts to open the container. If the seal is broken upon delivery, it is a clear indication that the food may have been tampered with.

Direct Thermal Labels

	Description	QTY	Item #
A	56 x 159mm	350 labels/roll	IT118676
