## Work with the crew who will help you navigate setup of your new MenuPilot™ automated food labeling platform
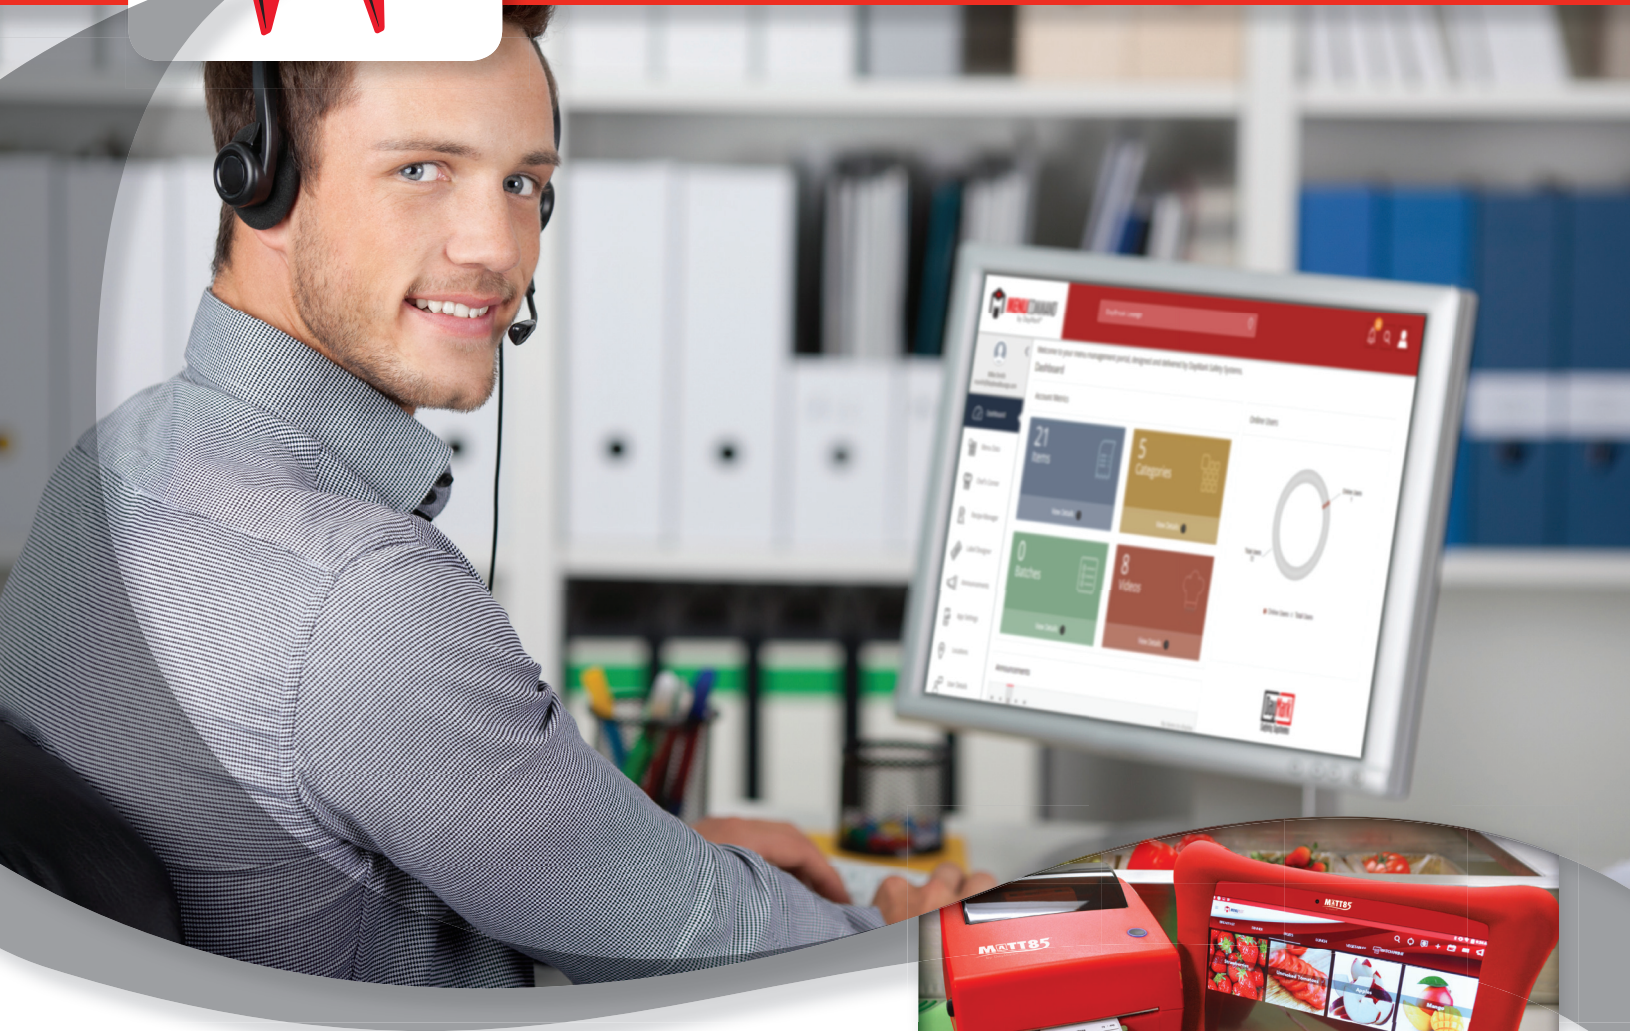

You have chosen DayMark's complete automated food labeling platform, including the **MenuPilot™** app-driven kitchen interface and **MenuCommand™** cloud-based corporate dashboard. Upon delivery of (or just after you receive) your companion Matt85 Bluetooth-enabled hardware, DayMark's support crew will generate admin user credentials and a corporate location from which the user is able to build a store hierarchy, as well as an import template that can be easily populated with menu data and intuitively imported into the system. Immediately after initial setup, standard technical support from DayMark is available 24/7/365.

**Because no two foodservice operators are alike, DayMark also offers the more advanced Flight Plan program\*** – a concierge style service that includes a comprehensive suite of customer care options that will help you take flight with MenuPilot and MenuCommand even faster.

*Additional charges apply                    (Continued on back.)
